# Volume booster app download uptodown

A simple, small, free app to increase the volume of your speakers or headphones. Useful for movies, audiobooks, and music. Use it at your own risk. Playing audio at high volumes, especially for long times, can destroy speakers and or damage hearing. Some users have reported speakers and earphones being destroyed. If you hear distorted audio, lower the volume (but it may be too late). By installing this application, you agree that you will not have its developers liable for damage to hardware or hearing, and you use it at your own risk. Think of it as experimental software. Not all devices support this software. Try it at your own risk and see if you work. This app doesn't work on most 4.2.1-4.3 devices. It should work at 4.4 and higher, as well as on devices under 4.2.1. This is not to adjust the volume of the speakerphone in a phone call (which has its own impetus, I think), but to adjust the volume of music, movies, and applications. When you set the thrust to zero, the Volume Booster will die. Notification icons are for easy launch only. If you don't like seeing the notification icon when Volume Booster is off, just go to Volume Booster Settings and set it to appear only when Volume Booster is running. <div><div jsname=WJz9Hc style=display:none>بسير وص ير، التربيق المجاني لتعزيز مكبر الصوت او سماعة حجم الصوت. من المفيد للأفلام والكتب السمعية والموسيقى. استخدام على مسؤوليتك الخاصة. تشغيل الصوت على كميات كبيرة، خاصة بالنسبة لمبلغ لفترات طويلة من الزمن، يمكن أن تدمر مكبرات الصوت و أو السمع الضرر. بعض المستخدمين قد أشار متحدثون المدمرة وسماعات الأذن. إذا سمعت صوت مشوه، وانخفاض حجم (ولكن قد يكون متأخرا جدا). عن طريق تثبيت هذا التطبيق فإنك توافق على أنك لن يعقد المطور مسؤولة عن أي ضرر في الأجهزة أو السمع، وتقوم باستخدامه على مسؤوليتك الخاصة. نعتبر أن هذا البرنامج التجريبي. لا تدعم كافة الأجهزة هذا البرنامج. تحاول ذلك على مسؤوليتك الخاصة، ومعرفة ما إذا كان لك يعمل. لا يعمل هذا التطبيق على معظم الأجهزة 4.2.1-4.3. يجب أن تعمل على 4.4 وأعلى، وكذلك على الأجهزة أدناه 4.2.1. عدادات الصوت الداعم ووتعيين نإ لرإ علام عند حجم الداعم هو خارج، واهبواإ ب في رية رمزإا كنت لا ترإ .هذه ليست لضبط حجم مكبر الصوت في المكالمات الهاتفية (الذي لديه دفعة الخاصة به، على ما أظن)، ولكن لضبط مستوى الصوت من الموسيقى والأفلام والتطبيقات. عند تعيين دفعة من الصفر، وحجم الداعم يكون خارج. رمز الإخطار فقط لسهولة إطلاق يهر فق إ تش يتم عندما إالتخزين الداعم وحدة يل.<div><div class=show-more-end> Take your music to any official Google music service What's the name of this song? Installation is quite simple and you don't need any special skills to use extensions. It's easy to work with because of its easy-to-use interface. Sound booster is very useful and a cool extension for your chrome browser. Increase volume up to 600% when clicked. If you want your pc or laptop harder then you will definitely have to install this extension. Install, share with friends and feel free to leave a comment or request. x4 sound amplifier amplifier xiaomi sound amplifier xda sound amplifier xp sound amplifier x6 sound amplifier bmw x5 sound
